C++作业报告——文件操作

1.代码见src文件

2.简要原理分析

主要采用控制台交互的方法，通过用户输入指令，程序读取指令并进行相关操作。

3.运行结果：（结果较长无法截图，复制了控制台log信息）

```
       ***                    ***
    *********              *********
  ************          ************
 *************         *************
 **************      **************
 *************** ***************
  *******    *** ***    *******
   ******      *****      ******
    ******      ***      ******
     ******      *      ******
      ******  *  ******
         ***********
          *********
           *******
            *****
              *
